Set'n'Drive (S'n'D) parameterising resistor

47.901.1055.50

DESCRIPTION

The resistor is protected against contact already integrated into a housing and is quick and easily inserted into the terminal block of the electronic control gear. Push in - Ready.
Information on resistance and automatic mounting with ADS systems on request.

Product name:	Set'n'Drive (S'n'D) parameterising resistor
Short description:	For easy insertion into LED ballast for adjusting the Iout
Resistor:	0.374 kOhm
Color:	white
Weight:	2
Pkg.:	600
